

Privacy Guides for Snapchat

1. Open Snapchat and log-in to your child's profile.
2. Go to the profile screen by tapping the **Bitmoji** or **profile icon** in the upper-left corner.
3. Tap the **Settings gear** icon in the upper-right corner.
4. Scroll to the **Privacy Controls** section.
5. Select **See Me in Quick Add** and disable this option to avoid your child from appearing in other users' suggested Quick Add box.
6. Go back to the **Privacy Controls** section. Tap on **Activity indicator** and turn it off.
7. Go back to the **Privacy Controls** section. Tap on **See my location**.
 - There are multiple options for location settings:
 - **My Friends**: Selecting this option shares your child's location with the users who are connected as Snapchat friends with your child's profile.
 - **My Friends, Except...**: This setting allows you to exclude anyone from your child's list of contacts.
 - **Only These Friends**: This setting allows you to choose a specific list of individuals from your child's contact list to view their location.
 - **Ghost Mode**: Selecting this option ensures your child's location remains completely private, even to users who are connected as Snapchat friends.
8. If you have your own Snapchat account, we recommend setting up **Family Center** to monitor your child's activity and who they are friends with.
